Guidelines for Authors

Manuscript: Manuscripts submitted for publication in Menara Perkebunan can be either research results or reviews. Manuscripts should be written in English. They should be typed on A4 paper with 1.5 spacing, and each page should be numbered consecutively. The title should be concise, not exceeding twenty words. Below the title, the author's name, institution, and address, followed by the abstract. Manuscripts should be submitted to the Editorial Board through the Open Journal System at <https://mp.iribb.org/mpjurnal/about/submissions> accompanied by a cover letter from the author.

Abstract: The abstract should be provided not exceed 250 words and should summarize the entire article, including the objectives, materials and methods, results, and conclusions.

Scientific Names: For the first mention, the full scientific name, including the discoverer's name, should be written. Thereafter, it can be abbreviated to the initial letters.

Abbreviations: Long chemical terms should be abbreviated according to standard conventions, such as DNA, RNA, ATP, etc. Dates should not be abbreviated. Units of measurement should be written out unless preceded by a number, e.g., g, mg, mL. Numbers from zero to ten should be written in words, except when followed by a unit of measurement, in which case they should be written in Arabic numerals, e.g., 3 tons, 7 mL. Fractional numbers should be written as decimals.

Tables, Figures/Photos: Titles for tables, figures, and photos should be brief and clear. The title for tables should be placed above the table, while the title for figures/photos should be placed below the respective figure/photo.

Proof and Offprint: Proofs will be sent to the authors for review and approval for publication, with a signature required for print approval.
